In time of war France puts 370 out of every 1,000 of her population in the field; Germany, 310; Russia, 210.

A New York city photographer deflights some of his patrons by marking their handkerchiefs with their photographs.

Philadelphia's city hall tower will be 517 feet 4 inches high when the statue of William Penn shall have been put in place.

The first oil well in America was on a small farm in the mountains of Wayne county, Kentucky. It was discovered in 1825.

The swell visiting card in China is an oblong piece of red paper about 4 inches wide and 8 inches long, with the name in black characters.

Three-tenths of the earnings of a Belgian convict are given to him for the education of his term of imprisonment. Some of them thus save more money in jail than they ever saved before.

The fish-hooks used to-day are of precisely the same shape as those employed twenty centuries ago. The only difference is in the material. Then they were of bronze; now they are of steel.

Ornithologists do not tell us that the chick is the most wonderful of birds, yet the fact remains that, in proportion to weight, it is far more important to the human race than any other animal.

A curious barometer is used in Germany and Switzerland. It is a jar of water, with a frog and a stop-ladder in it. When the frog comes out of the water and sits on the steps a rain storm will soon occur.

No wonder the emperor of Germany likes to be away from home as much as possible. His wife gets up at six every morning and makes his coffee with her own hands.

A St. Joseph young man proposed to St. Joseph girl and said he neither drank smoked nor played cards, and she wanted to know if he expected her to marry a freak.

Proude was not the greatest historian who ever lived, nevertheless England has none left except Lecky of equal fame. On that side of the Atlantic, as well as on this side, a sort of literary interregnum prevails.

The census places the egg production of 1880 at nearly 10,000,000,000, valued at \$183,441,000, while the chickens themselves are worth \$142,641,350. A chicken fancier is entitled to take as much consideration as a breeder of horses.

A Maryland man has a hunting terrier, the only one of which there is record. It has been taught to lure its fellows out of the soft mud of the creeks, and last year the "catch" of terriers through the aid of the "hunter" yielded a sum exceeding \$6,000.

In proportion to the population France has more money in circulation than any other country. In France it averages \$450 per capita; in the United States, \$24.34; in England and Germany, \$18.42; in Japan, \$4.90; in China, \$1.75; in Central America, \$4 cents.

It recalls old times to read of the arrival of a whaler from the Arctic sea with a cargo that will net her owners half a million, and give each of her crew an extra \$1,000. But the whaling of to-day is much more of a lottery than it used to be, and a fortunate voyage is a rare exception.

A great many persons are mistaken regarding the right of women to vote in Illinois. Some are under the impression that they can vote for all of the state, county and local tickets. This is a error. The ballot in woman's suffrage is confined to the trusteeship of the University of Illinois.

The Witwatersrandt mines in South Africa have recently been examined by an official expert from Germany, and he estimates that they contain about 90,000,000 ounces of gold. There are other deposits of great value in that and other parts of the world, but the supply of gold is not likely to run short for a long time to come.

The Chinese bride, like the English day, is richly dressed upon her wedding day. "Lily-Shoot," as she is called, "brides her hair with a red silk cord, and wears a hair of the sprig of evergreen over her head. When the ceremony is over the wedding party go solemnly forth to pray before the tablets erected to the memory of the bridegroom's ancestors.

A comparison between Corbett and Fitzsimmons, made by an Eastern paper, shows that the muscular development of the Australian is greater than that of the champion. The only advantage Corbett has over his rival is in height and reach, while Fitzsimmons' muscular equipments are greater in every other respect.

A custom that has existed for several centuries is still maintained in some towns on the lower Rhine. On Easter Monday—after the town crew or clerk calls the young people together and to the highest bidder sells the privilege of dancing with the chosen girl, and her only, during the evening. The fees flow into the public poor box.

The observers announce that the recent changes in the appearance of the "New Mars" seem to confirm the finding of the tremendous polar ice cap and the sweeping of vast floods over the southern part of the planet, which is now experiencing six months of summer. The indications are that the inhabitants of Mars have more water than they know what to do with and they will not be able to get rid of it by pursuing their favorite occupation of digging canals.

A remarkable freight train through the Hoosac tunnel recently. It consisted of fifty-seven cars loaded with Worcester salt on the way from the works in Silver Springs, N. Y., to wholesale grocers in Boston and other cities in New England. Two locomotives pulled it and one held it back on the down grades. The salt weighed about 2,000,000 pounds. It was the largest shipment of chloride of sodium ever made by rail. The train was the longest that ever rumbled through the Hoosac tunnel.
